

Esempi per il comando delle valvole a manicotto

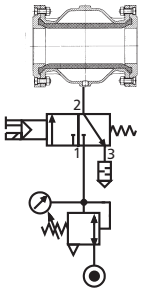

Example of Pinch Valve Controls

- 1) 

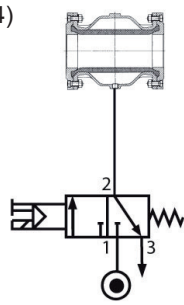

Valvola elettromagnetica a 3/2 vie aperta senza corrente (NO)

3/2-way solenoid valve currentless open (NO)
- 2) 

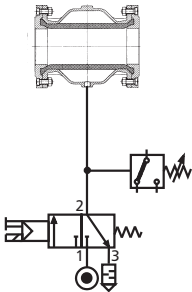

Valvola elettromagnetica a 3/2 vie (NC) senza corrente chiusa con valvola di decompressione rapida

3/2-way solenoid valve (NC) normally closed with quick exhaust valve
- 3) 

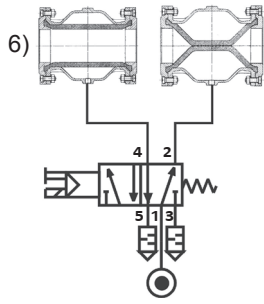

Valvola elettromagnetica a 3/2 vie (NC) senza corrente chiusa con riduttore di pressione

3/2-way solenoid valve (NC) normally closed with pressure regulator
- 4) 

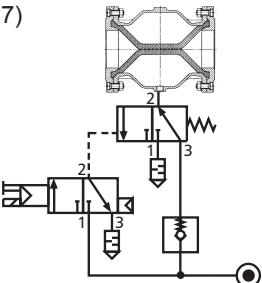

In caso di aspirazione: Pompa per vuoto al collegamento 3

Conveying by suction:
Connect vacuum-pump or bypass at connection 3
- 5) 

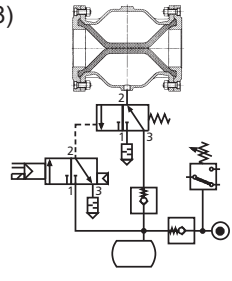

Valvola elettromagnetica a 3/2 vie senza corrente chiusa (NC) con interruttore a pressione

3/2-way solenoid valve normally closed (NC) with pressure switch
- 6) 

Valvola elettromagnetica a 5/2 vie per controllo di commutazione

5/2-way solenoid valve for various regulation
- 7) 

In caso di caduta di pressione / corrente: la valvola a manicotto rimane chiusa

For pressure power shut down: Pinch valve remains in closed position.
- 8) 

In caso di caduta di pressione / corrente: la valvola elettromagnetica si può chiudere anche in posizione di apertura (accumulatore di aria).

For pressure power shut down: Pinch valve can close in open position (air tank).
